

If you utilize a digital wallet (such as **Apple Pay**, **Google Pay**, or **Samsung Pay**) with your **Lakeside Credit Union Visa Credit Card**, you must complete two quick steps:

1. **Delete** your current Lakeside Credit Union Visa card from your digital wallet.
2. **Re-add** the card back into your wallet.

Why is this required?

This update is mandatory due to a **new key load** that introduces enhanced **EMV support** (chip-level security technology), ensuring your transactions continue to be safe, seamless, and fully protected against fraud.

Thank you for your cooperation and for helping us keep your accounts secure!
